Corbin Jensen

Computer Science Student at Thompson Rivers University
Lethbridge, Alberta, Canada

Summary

I'm a computer science student with a passion for problem-solving
and a drive to create innovative technical solutions. My background
spans IT support, network management, and film-industry lighting
technology—giving me a versatile skill set that ranges from
configuring smart lighting systems on major productions to deploying
complex I.T. infrastructure in corporate and industrial environments.

Currently pursuing my Bachelor of Computer Science at Thompson
Rivers University, I've also completed a Certificate in Agile
Leadership from UBC Sauder School of Business. My professional
interests include agile project delivery, business requirements,
and code reviews. Whether I'm optimizing a network for remote
oilfield sites or streamlining a web development project, I love
digging into the details and coming up with creative ways to enhance
performance and efficiency.

Ultimately, I thrive on tackling real-world challenges, collaborating
with diverse teams, and combining technical know-how with a
solution-focused mindset. If you're seeking someone who brings
hands-on expertise, adaptability, and an eagerness to learn, I'd
welcome the chance to connect.

Experience

City of Lethbridge
Computer Systems Analyst
April 2025 - Present (2 months)

- Business applications and process Improvement project, IT summer student
position.

IATSE Local 891
Technical Production Crew (Stagehand) in Film, TV, Live Events, and
Trade Shows
September 2015 - December 2024 (9 years 4 months)

Vancouver and Toronto, Canada

• Operated and maintained smart lighting systems, networked controls (DMX, wireless), and temporary energy systems for major productions.

• Supported technical production across unionized (IATSE) and non-union environments, including film, TV, live events, and corporate trade shows.

• Troubleshot technical issues to ensure seamless execution in high-pressure environments, serving audiences and attendees of 500–17,000+.

• Collaborated with production managers, gaffers, and technical directors to meet creative and operational requirements.

• Credits include The Handmaid's Tale, Star Trek Discovery, Skyscraper, Supergirl, Vancouver Symphony Orchestra, Queen Elizabeth Theatre (2,765 seats), and Pacific Coliseum (up to 17,500 attendees).

DataDrill Communications Inc
Computer Network Support Specialist
October 2014 - March 2015 (6 months)
Calgary, Alberta, Canada

- Installed, maintained, and repaired industrial I.T. equipment on remote oil and gas drilling sites.

- Deployed mesh Wi-Fi systems enabling industrial internet of things (IoT), and VOIP telephony.

- Enhanced wireless cellular voice and data services from TELUS, optimized signals for reliability.

Corbin Jensen Digital
Web Developer
April 2014 - September 2014 (6 months)
Toronto, Calgary, Vancouver

- Built custom web sites for clients on WordPress, Shopify, and Nation Builder content mgmt. systems.

- Used modern web development tech such as responsive web design, JavaScript, jQuery, HTML 5.

- Managed the projects and worked with the clients from initial brainstorming through to website launch.

- Volunteered web development skills to help a charity build and maintain its website on WordPress

Long View Systems
Computer User Support Specialist
August 2012 - August 2013 (1 year 1 month)
Vancouver, British Columbia, Canada

- Provided I.T. consulting support services for client Club Intrawest's 300 end-users across 7 locations.
- Upgraded over 150 PCs in a major hardware upgrade and Windows XP to 7 migration. Worked with   the users to ensure the software unique to their roles were operational on the new OS.
- Designed, built, and deployed 10 custom computers to serve the unique needs of sales center users, ensured security by partitioning off the computers on a separate network.

Compugen Inc
Computer User Support Specialist
October 2010 - October 2011 (1 year 1 month)
Calgary, Alberta, Canada

- Recognized by Compugen's "Encore" award in client service excellence for IT consulting at CNRL.
- Supported large enterprise client CNRL's 4800 end-users I.T. needs at a time of major growth.
- Deployed over 400 new computers and upgraded more as part of a major Windows XP to 7 migration.
